PHYSICAL DATA

APPERANCE.....	White milky liquid
ODOUR.....	Weak
pH (pure).....	8.0 ± 0.4
TOTAL SOLIDS.....	21%
SLIP INDEX.....	Meets or exceeds the ASTM D2047 norm
GLOSS.....	High initial gloss
DRYING TIME.....	30 minutes, depending on humidity
DETERGENT RESISTANCE.....	Excellent
WATER RESISTANCE.....	Excellent
LONG-TERM REMOVABILITY.....	Excellent
SOIL RESISTANCE.....	Excellent
BLACK MARK RESISTANCE.....	Very good
COVERAGE.....	up to 3000pi ² per 4 litres
STABILITY.....	Minimal 1 year
VOC.....	4.4%

USE

VL07 Zinc-free floor finish is used to maintain a lasting "wet look" with ultra high speed maintenance programs, where the environment is a priority. May also be used for low frequency maintenance programs. **VL07 Zinc-free floor finish** meets the strictest criteria of performance and efficiency, without compromising the health of the users.

DIRECTIONS FOR USE

- Strip floor with **VL06 Stripper** of **Lépine's " VERT " series.***
- Rinse well with water and let dry.
- Apply three (3) uniform coats of finish.
- Let dry for 30 minutes between each application.
(Drying time could vary depending on humidity conditions.)
- To optimize efficiency, apply two more coats.
- * Before proceeding, make sure the floor can withstand complete stripping.

High speed burnishing: Best results are obtained when 3 coats or more have been applied. Allow to dry before polishing. For best results on floor maintenance, consult your Lépine's technical representative.

ADVANTAGES

- Zinc, heavy metal, ammonia and APE free
- High initial gloss
- Resistance to scratches tested on heavy traffic areas.
- Excellent response to the UHS.
- No ingredients that compose **VL07 Zinc free floor finish** are present on the following lists: NPRI, IARC, endocrine disruptor of the European Union, chemicals that are known to the State of California to cause reproductive or developmental toxicity.

PRECAUTIONS
