ODOUR: Odourless
pH: 3,0 ± 0,4
SOLUBILITY: Complete
*According to OECD 301E test

FLAMABILLITY: No
RINSING PROPERTY: Excellent
BIODEGRADABILITY: Yes*
COMPOSITION: Organic acid, glycol, surfactants

USE

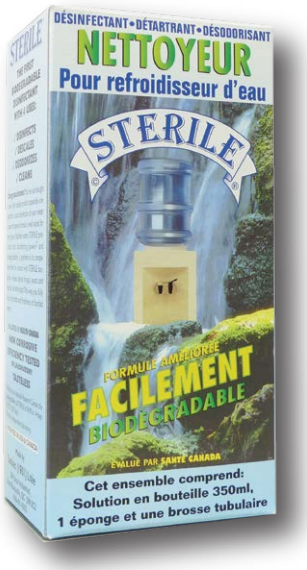

To clean, descale and sanitize water coolers. For domestic and food plant use.

DIRECTIONS

Unplug your cooler. Remove empty bottle. Drain water from reservoir(s) through faucet(s). Pour 50 mL of STERILE on all the surface of the basin and in the faucets. Let soak for 5 minutes. Wear waterproof gloves and rub the basin with a scrubbing sponge. Clean the canals and faucets with tubular brush. Rinse thoroughly with potable water. Drain water through faucets to remove all traces of disinfectant.

N. B.: Never use or spray STERILE in the cold or hot water faucet or tank without draining and rinsing thoroughly with potable water.

The 350 mL size (included in kit) allows 7 treatments of 50 mL/each.

DISPOSAL

Rinse the emptied container thoroughly. Make it unsuitable for further use, dispose them in accordance with provincial laws. For disposal of unused, unwanted or spills clean up, contact provincial regulatory agency or the manufacturer.

PRECAUTIONS

Avoid contamination with foods. Rinse thoroughly with potable water any surface having contact with food.
Caution: Wear waterproof gloves and eye protection. Eye irritant. If splashed in eye, flush thoroughly with potable water.
Store tightly closed. Keep cool.
